

# AWS – CREATING USER FROM IAM

**Step 1:** From the management console search for "IAM" and go to IAM dashboard

**Step 2:** Select the Users menu. Navigate to the Users screen. You'll find it in the IAM dashboard, under the Identity and Access Management (IAM) drop-down menu on the left side of the screen. Click on **Users**.

**Step 3:** Click on User and **Create User** to navigate to a user detail form. Provide the username and click on **Next**

### Specify user details

#### User details

User name

The user name can have up to 64 characters. Valid characters: A-Z, a-z, 0-9, and + = , . @ \_ - (hyphen)

☐ Provide user access to the AWS Management Console - *optional*  
If you're providing console access to a person, it's a [best practice](#) to manage their access in IAM Identity Center.

**i** If you are creating programmatic access through access keys or service-specific credentials for AWS CodeCommit or Amazon Keyspaces, you can generate them after you create this IAM user. [Learn more](#)

Cancel Next

**Step 4:** Select attach policies directly, and check the "administrator access" and click on next

☐ Add user to group  
Add user to an existing group, or create a new group. We recommend using groups to manage user permissions by job function.

☐ Copy permissions  
Copy all group memberships, attached managed policies, and inline policies from an existing user.

☒ Attach policies directly  
Attach a managed policy directly to a user. As a best practice, we recommend attaching policies to a group instead. Then, add the user to the appropriate group.

### Permissions policies (1/1159)

Choose one or more policies to attach to your new user.

Filter by Type All types ▼

< 1 2 3 4 5 6 7 ... 58 >

	Policy name	Type	Atta...
<input type="checkbox"/>	<a href="#">AccessAnalyzerServiceRolePolicy</a>	AWS managed	0
<input checked="" type="checkbox"/>	<a href="#">AdministratorAccess</a>	AWS managed - job function	0

**Step 5:** On review page click on "Create User"

Console sign-in [Enable console access](#)

Console sign-in link <a href="https://282505403665.signin.aws.amazon.com/console">https://282505403665.signin.aws.amazon.com/console</a>	Console password Not enabled
---	---------------------------------

Click on enable, custom password, provide password and click on **"Apply"**

Manage console access

Manage sai's AWS console access and password.

Console access

☒ Enable

☐ Disable

Disabling removes the pre-existing password.

Set password

☐ Keep existing password

☐ Autogenerated password

☒ Custom password

- Must be at least 8 characters long
- Must include at least three of the following mix of character types: uppercase letters (A-Z), lowercase letters (a-z), numbers (0-9), and symbols ! @ # \$ % ^ & \* ( ) \_ + - (hyphen) = [ ] { } ' "

☐ Show password

☐ User must create new password at next sign-in

Users automatically get the [IAMUserChangePassword](#) policy to allow them to change their own password.

[Cancel](#) [Apply](#)

### Console password

**You have successfully enabled the user's new password.**

This is the only time you can view this password. After you close this window, if the password is lost, you must create a new one.
